

NEXATRADES INVESTMENT

Empowering Investors Through Intelligent AI Trading Systems

Dear Prospective Validator,

We are pleased to extend this formal offer inviting you to join **NexaTrades Investment** as a **Validator**, a key role within our intelligent trading and investment network. As part of our expanding AI-powered ecosystem, your contribution will help uphold the accuracy, transparency, and trust that define NexaTrades.

Position Overview

Role:	Validator
Employment Type:	Part-Time (Remote)
Work Schedule:	2 Hours per Day, Monday to Friday
Days Off:	Weekends (Saturday & Sunday)
Weekly Salary:	USD \$5,000 (paid every Friday)

About the Validator Role

As a **Validator**, you will play an essential role in ensuring that NexaTrades' automated trading operations and financial records remain accurate and reliable. This position is vital to maintaining platform integrity, verifying transactions, and validating smart contract performance within our AI investment framework.

Key Responsibilities:

- Review and validate daily transactions processed by NexaTrades' AI systems.
- Confirm trade accuracy and ensure investor data integrity.
- Identify and report discrepancies or system irregularities to the compliance team.
- Verify accuracy of investor payouts and automated profit settlements.
- Uphold strict confidentiality and data security standards.

Training and Support

At NexaTrades, we value excellence and continuous learning. **Comprehensive training is available** for individuals who may not have prior experience in validation or trading systems. Our onboarding program provides all necessary guidance, helping you understand system workflows, tools, and operating procedures before you begin active validation.

Compensation & Benefits

- **Weekly Payment:** USD \$5,000 (via NexaTrades wallet).
- **Flexible Schedule:** Only 2 working hours per day.
- **Weekends Off:** Saturday and Sunday.
- **Performance Incentives:** Bonuses for consistent accuracy and commitment.
- **Continuous Support:** Access to training and system updates.
